

Below are a few helpful tips on how to protect your identity:

- ◆ To protect against identity theft, always question someone who is asking you to reveal any personally identifiable information. Find out how it will be used and whether it will be shared with others.
- ◆ Keep your Social Security card in a safe place and don't give out your number to un-trusted sources.
- ◆ When you discard receipts, copies of credit applications, insurance forms, health records, bank statements, or other personal documents, tear or shred them.
- ◆ Order a copy of your free annual credit report. Make sure it's accurate and includes only those activities you've authorized.
